FUNCTIONAL TESTING

1. Unit Testing

MODULE: Login

Test Case ID:	1	Test Priority:	High
Test Title:	Verify successful login	Description:	To check if the admin/user is able to successfully log in to the application
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Valid username and password. Properly configured python test environment. Pass/Fail criteria should be well known.
Dependencies:	Valid URL

Step	Test Steps	Test Data	Expected Result
1.	Launch application	http://127.0.0.1:8000/sa	The page is correctly displayed and the link is not broken.
2.	Enter correct username and password and hit the login button.	Username:admin Password:***	The user successfully logs in to the system.

Post-conditions:	Home page of the application appears.
-------------------------	---------------------------------------

MODULE: Orders

Test Case ID:	2	Test Priority:	Low
Test Title:	Verify the links to order is not broken.	Description:	To check if the order confirmation receipts of all customers is properly printed
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous
Dependencies:	Valid URL

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Go to orders	http://127.0.0.1:8000/sa/orders/	The page is correctly displayed and the link is not broken.

Post-conditions:	-
-------------------------	---

Test Case ID:	3	Test Priority:	Medium
Test Title:	Verify printing of order confirmation	Description:	To check if the order confirmation receipts of all customers is properly printed
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Test Case 2		

3.	Select the order by clicking on checkbox and then selecting the print confirmation pdf.	http://127.0.0.1:8000/sa/orders/	The pdf gets generated.
----	---	----------------------------------	-------------------------

Post-conditions:	A pdf is generated.
-------------------------	---------------------

Test Case ID:	4	Test Priority:	Medium
Test Title:	Verify cancellation of order	Description:	To check if the order of a customer can be cancelled by admin.
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Test Case 2		
3.	Select the order by clicking on checkbox and then selecting the cancel order.	http://127.0.0.1:8000/sa/orders/	The selected order gets cancelled.

Post-conditions:	Cancelled order.
-------------------------	------------------

Test Case ID:	5	Test Priority:	Medium
Test Title:	Verify creation of new order link is not broken.	Description:	To check if the link to new order works perfectly well.
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
------------------------	-------------------

Dependencies:	Valid URL.
----------------------	------------

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Test Case 2		
3.	Select the new order button.	http://127.0.0.1:8000/sa/orders/new/	The page is correctly displayed.

Post-conditions:	-
-------------------------	---

Test Case ID:	7	Test Priority:	Medium
Test Title:	Verify if certain boxes are selected before creating a new order.	Description:	To verify if certain boxes are selected before creating a new order.
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
3.	Test Case 5		
4.	Enter Details and verify if “ save customer details while creating order” is selected.	1.http://127.0.0.1:8000/sa/orders/new/ 2. save customer details while creating order	save customer details while creating order Is checked and all other checkboxes are unchecked.

Post-conditions:	-
-------------------------	---

Test Case ID:	8	Test Priority:	Medium
----------------------	---	-----------------------	--------

Test Title:	Verify if a product can be selected while creating a new order.	Description:	To verify if a product can be selected while creating a new order.
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
3.	Test Case 5		
4.	Click on select a product button and maximise the window and then click on products to be selected by checking the checkbox and then clicking the name of the product.	Name of the product: Clinique Happy	The product gets added to the list of selected items to be ordered.

Post-conditions:	-
-------------------------	---

Test Case ID:	9	Test Priority:	Medium
Test Title:	New order with billing address same as shipping address.	Description:	To check if new order can be successfully created by the admin when billing address is same as shipping address.
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
3.	Test Case 5		
4.	Test Case 7		
5.	Select checkbox “ ship to billing address” in customer details.	http://127.0.0.1:8000/sa/orders/new/	Only billing address field appears in the form.

6.	Create new order and click on Proceed and then click on confirm.	Billing Address: Name: Palak Phone: 7597476973 Email: smarty1palak@gmail.com Street: Vishnu Path Street(2): Keshav Vihar ZIP/Postal Code: 575025 City: Surathkal Region: Karnataka Country: India Order Contents: Add new items as mentioned in Test Case 8. Shipping method: aa Payment Method: SBI Bank	A page with order details is displayed with the link of the format : http://127.0.0.1:8000/sa/orders/order_id/
----	--	--	---

Post-conditions:	Success Alert
-------------------------	---------------

Test Case ID:	10	Test Priority:	Medium
Test Title:	Verify creation of new order with checkbox “order for company” selected.	Description:	To check if new order can be successfully created by the admin when billing address the order is an order for company.
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
3.	Test Case 5		
4.	Test Case 7		
5.	Test Case 9	All details mentioned in Test case 9 along with Tax No: 123	A page with order details is displayed with the link of the format : http://127.0.0.1:8000/sa/orders/order_id/

Post-conditions:	Success Alert.
-------------------------	----------------

Test Case ID:	11	Test Priority:	Medium
Test Title:	Edit the created order.	Description:	To check if new order created can be edited
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
3.	Test Case 9		
4.	Edit the order	http://127.0.0.1:8000/sa/orders/4/edit/	A page with order details is displayed which can be edited .

Post-conditions:	-
-------------------------	---

Test Case ID:	12	Test Priority:	Low
Test Title:	Verify the links to carts is not broken.	Description:	To check if the link is working correctly.
Test designed by:	Palak	Test Design Date:	11/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Go to Carts	http://127.0.0.1:8000/sa/carts/	The page is correctly displayed and the link is not broken.

Post-conditions:	-
-------------------------	---

MODULE: Campaigns

Test Case ID:	13	Test Priority:	Low
Test Title:	Verify the links to basket campaign is not broken.	Description:	To check if the links to basket campaign is not broken.
Test designed by:	Palak	Test Design Date:	12/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

FUNCTIONAL TESTING

2. Blackbox Testing

Module: Report

Test Case ID:	25	Test Priority:	Low
Test Title:	Verify the links to report is not broken.	Description:	To check if the links to report is not broken.
Test designed by:	Palak	Test Design Date:	12/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Go to report.	http://127.0.0.1:8000/sa/reports/	The page is correctly displayed and the link is not broken.

Post-conditions:	-
-------------------------	---

Test Case ID:	26	Test Priority:	
Test Title:	Verify if admin can successfully get a report.	Description:	To check if the admin is able to successfully get a report.
Test designed by:	Palak	Test Design Date:	

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 25		
2.	Enter details of report and get report.	Type: New customers Output format: Pdf Download: check Shop: default shop Start Date:2019-10-03 17:43 End Date:2019-10-22 17:43 Group by: Year/Month	A pdf with report is successfully generated.

Post-conditions:	Success Alert
-------------------------	---------------

Module: Settings

Test Case ID:	27	Test Priority:	
Test Title:	Verify the links to taxes is not broken.	Description:	To check if the links to taxes is not broken.
Test designed by:	Palak	Test Design Date:	

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Go to taxes in settings.	http://127.0.0.1:8000/sa/taxes/tax/	The page is correctly displayed and the link is not broken.

Post-conditions:	-
-------------------------	---

Test Case ID:	28	Test Priority:	Medium
----------------------	----	-----------------------	--------

Test Title:	Verify Admin can successfully create a new tax.	Description:	To check if a new tax can be successfully created with details filled.
Test designed by:	Palak	Test Design Date:	12/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 27		
2.	Create a new tax and save,.	Name: GST Enabled: check Tax Rate: 125	The tax is successfully saved and available for further edits through the link http://127.0.0.1:8000/sa/taxes/tax/tax_id/

Post-conditions:	Success Alert
-------------------------	---------------

Test Case ID:	29	Test Priority:	Low
Test Title:	Verify the links to users is not broken.	Description:	To check if the links to users is not broken.
Test designed by:	Palak	Test Design Date:	12/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Go to users in settings.	http://127.0.0.1:8000/sa/users/	The page is correctly displayed and the link is not broken.

Post-conditions:	-
-------------------------	---

Test Case ID:	30	Test Priority:	High
Test Title:	Verify Admin can successfully create a new user.	Description:	To check if a new user can be successfully created with details filled.
Test designed by:	Palak	Test Design Date:	12/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 29		
2.	Create a new user and save,.	Username: richie Email Address: richa@a.com First Name: Richa Last Name: Chadda Passowrd: *** Send email confirmation: check	The new user is successfully created and comes in the list of users.

Post-conditions:	Success Alert
-------------------------	---------------

Test Case ID:	31	Test Priority:	High
Test Title:	Verify Admin can customize admin menu.	Description:	To check if admin can customize admin menu.
Test designed by:	Palak	Test Design Date:	12/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

1.	Test Case 35		
2.	Create new step and save.	Condition: boolean equal Action: add notification Stop processing	A new step is successfully added.

Post-conditions:	Success Alert
-------------------------	---------------

Test Case ID:	37	Test Priority:	Medium
----------------------	----	-----------------------	--------

Test Title:	Telemetry	Description:	To check if link to telemetry is not broken
Test designed by:	Palak	Test Design Date:	13/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Click telemetry.	http://127.0.0.1:8000/sa/system/telemetry/	The page successfully opens.

Post-conditions:	-
-------------------------	---

Test Case ID:	37	Test Priority:	Medium
Test Title:	API	Description:	To check if link to API is not broken
Test designed by:	Palak	Test Design Date:	13/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Click API.	http://127.0.0.1:8000/sa/system/api/	The page successfully opens.

Post-conditions:	-
-------------------------	---

Test Case ID:	38	Test Priority:	Medium
Test Title:	API	Description:	To check if link to API is not broken
Test designed by:	Palak	Test Design Date:	13/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 37		
2.	Configure API permissions.	Everything: Default Tax: disabled	Admin is successfully able to configure API permissions.

Post-conditions:	Success Alert box
-------------------------	-------------------

Test Case ID:	39	Test Priority:	Medium
Test Title:	Data import	Description:	To check if the admin is able to successfully import data.
Test designed by:	Palak	Test Design Date:	13/10/19

Pre-conditions:	Same as previous.
Dependencies:	Valid URL.

Step	Test Steps	Test Data	Expected Result
1.	Test Case 1		
2.	Click import data.	http://127.0.0.1:8000/sa/importer/import	The page successfully opens.
3.	Import data and	Language: English	The admin successfully gets redirected to a

	continue	Importer: Product importer File: product_sample_import.xls	new page asking import method.
4.	Submit start import.	Import method: Only create	Data gets imported.
